Professional summary

Programming and Computer Systems Technician (UTN) with a Cybersecurity certification (Tokio School), focused on security operations and incident detection, with ongoing hands-on practice in SIEM and pentesting labs.

Projects and labs

Log ingestion and analysis with Elastic Stack (SIEM) — *Practical assignment, Tokio School*

- Deployed a SIEM stack with Elasticsearch, Kibana and Logstash on Ubuntu and integrated Elastic Agent through Fleet for centralized log collection.
- Imported and analyzed web access logs in Kibana (Discover and Data Visualizer): identified failed login attempts, unauthorized access to the admin panel and probes against /wp-login.php and /phpmyadmin.

Active Directory penetration test — *Capstone project, Tokio School*

- Performed a full penetration test against an Active Directory domain controller (Windows Server 2016) in my own lab, from reconnaissance with NetDiscover and Nmap through controlled exploitation.
- Identified and exploited, in a controlled manner, critical vulnerabilities using Impacket, CrackMapExec/NetExec and Metasploit (ZeroLogon, EternalBlue, PetitPotam and NoPac).
- Audited identity hygiene with ADPulse and wrote a technical and executive report with a severity matrix (CVSS) and a prioritized mitigation plan.

Other labs

- **LetsDefend:** complete training in SOC, SIEM, incident management and phishing analysis; hands-on practice in its SOC simulator.

Experience

Full-Stack Software Developer
Freelance
August 2026 – Present
Client and independent projects: a web-based digital catalog for a client and a Python Discord bot integrated with the OpenAI API.

- API integration and process automation with Python and JavaScript.

Store Manager
Kiosco202
January 2023 – April 2026

- Managed daily shift operations, ensuring accuracy in cash handling and closing procedures.
- Prepared and analyzed sales reports to identify patterns and support operational decision-making.

Education

Cybersecurity Certificate – Tokio School
February 2025 – June 2026
Training in information security, defensive and offensive architectures, and regulatory frameworks.

University Technical Degree in Programming and Computer Systems – U.T.N. Pacheco
August 2020 – December 2024

Courses

FORGE, "Tu Futuro" Program
May 2026 – Present
Development of socio-emotional and employability skills.

Skills

Wireshark, Burp Suite, Elastic SIEM, Wazuh, alert triage, network traffic analysis, incident documentation.
ISO 27001/27002, GDPR.
Linux, Windows, basic Active Directory, Docker.
C#, Java, Python, PowerShell, SQL, HTML, CSS, JavaScript.
Autonomy, problem solving, adaptability.

Languages

English B2 (spoken and written).
Spanish (native).
